EDUCATION

National Institute of Technology, Rourkela

Bachelor of Technology, Civil Engineering

Rourkela, Odisha

2025 - Present

- Self-directed software engineering track alongside coursework - full-stack development, data structures & algorithms, and system design (independent of major).

EXPERIENCE

HoardSpace Bookings Pvt. Ltd. — Chief Technology Officer

Dec 2025 – Present

- Owned all technical decisions as sole engineering lead for a full-stack booking marketplace, architecting the system from the ground up across frontend, backend, and infrastructure.
- Designed and shipped RESTful APIs and a scalable backend architecture supporting **25+ vendors (2.5k+ hoardings)** for core booking and payment workflows.
- Built and deployed production features end-to-end - authentication, booking engine, admin dashboard - reducing manual operations overhead.
- Established CI/CD and engineering workflows, cutting deployment time and improving release reliability.
- Partnered directly with founders to translate business requirements into a technical roadmap for the platform

PROJECTS

[HoardSpace - Online marketplace for outdoor advertising](#)

React · Node.js · Express · MongoDB

- Engineered a production marketplace connecting hosts and guests end-to-end, handling authentication, bookings, and payments across a full-stack architecture.
- Built a role-based admin dashboard for inventory and booking management, cutting manual coordination time; integrated Cloudinary for scalable media delivery.

[FormAS - Backend-as-a-Service for Form Handling](#)

Node.js · Express · Upstash Redis

- Built a backend-as-a-service platform letting developers collect form submissions via API with zero backend code, authenticated via secure API keys.
- Implemented Redis-based rate limiting and spam protection handling; shipped webhooks, email notifications, and JSON/CSV export.

[Elimics - Smart URL Management & Analytics Platform](#)

React · Node.js · MongoDB

- Built a production URL-shortening platform with password protection, link expiry, and click-limit controls for secure sharing.
- Engineered a real-time analytics engine tracking, visitor geography, and device data via a live dashboard.

[Pulse UI / Pulse Toast - Open-Source React Component Library](#)

React · TypeScript · npm

- Built and published an open-source, TypeScript-first React component library focused on developer experience; distributed via npm with over **2K+ downloads**.

TECHNICAL SKILLS

- Languages:** Java, JavaScript, TypeScript, HTML, CSS
- Frontend:** React, Next.js, Tailwind CSS, ShadCN UI, Vite, Aceternity UI
- Backend:** Node.js, Express.js, REST APIs, Socket.io, WebRTC
- Data & Infra:** MongoDB, SQL, Upstash Redis, Cloudinary, Vercel, Render
- Auth & Tools:** JWT, OAuth, Firebase Auth, Git, GitHub, Postman

ACHIEVEMENTS

- Winner, Google TechSprint Hackathon 2026 – built EchoCare; it records doctor-patient conversation and converts them into structured SOAP notes - ready to review and export; follows HIPPA rules
- 2nd Runner-up, IIT Bhubaneswar Pravaah Web Hackathon 2026 - built [cosmic-watch-mocha.vercel.app](#) to track risk of asteroids using NASA APIs
- Chief Technology Officer, HoardSpace Bookings Pvt. Ltd. — led engineering for a production startup from inception
- Published open-source npm package (Pulse UI), used in **2k+** external projects
