About Me

Frontend Developer pursuing B.Tech at NIT Rourkela with a strong interest in modern web technologies and user interface engineering. Building Pulse UI, a reusable React and TypeScript component library focused on performance, accessibility, and developer experience. Passionate about creating intuitive digital experiences and growing toward full-stack and software engineering roles.

Experience

Chief Technology Officer (CTO) - HoardSpace

December 2025 - Present

- Led technical development and product architecture for HoardSpace.
- Designed and developed frontend features using React, Next.js, TypeScript, and Tailwind CSS.
- Collaborated with co-founders on product strategy, feature prioritization, and technical decision-making.
- Built scalable and reusable UI components to accelerate product development.
- Managed Git workflows, code reviews, and engineering best practices.
- Worked closely with users to gather feedback and improve the platform experience.

Projects

Pulse UI - Build interfaces that feel alive. Live GitHub

- Built a modern React and TypeScript component library with 40+ reusable UI components.
- Developed animated components using Framer Motion and Tailwind CSS.
- Implemented dark mode, responsive design, and customizable APIs.
- Focused on performance, accessibility, and developer experience.

Elimics — Smart Link Analytics & URL Shortener Live

- Built and launched Elimics, a SaaS platform that transforms ordinary links into trackable assets with analytics and access controls.
- Created interactive dashboards to visualize engagement metrics including views, unique visitors, reopens, and last activity.
- Developed secure link-sharing features such as password protection, expiration controls, and document uploads.
- Engineered reusable frontend components and responsive layouts to ensure a consistent user experience across devices.
- Designed the platform around real-world creator, student, and portfolio-sharing workflows to improve visibility into link engagement.

- Developed and published a reusable React toast library with customizable UI and smooth animations.
- Focused on performance, minimal bundle size, and developer-friendly API design
- Achieved **1500+** total downloads on npm, demonstrating real-world usage and adoption

Portfolio Website — Personal Developer Portfolio [Live](#) [GitHub](#)

- Developed a modern portfolio website using Next.js, TypeScript, and Tailwind CSS to showcase projects, skills, and professional experience.
- Designed and implemented responsive layouts with seamless support across desktop, tablet, and mobile devices.
- Created interactive user experiences using Framer Motion animations and custom UI components.
- Integrated light and dark mode themes while maintaining a consistent design system throughout the application.
- Optimized performance, accessibility, and SEO using modern Next.js features and best practices.
- Deployed and maintained the application with continuous updates as new projects and features were developed.

Skills

- **Languages:** TypeScript, JavaScript, Java
- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools:** Git, GitHub, VS Code, Postman
- **Concepts:** REST APIs, Responsive Design, Component Architecture, State Management, Performance Optimization

Education

National Institute of Technology, Rourkela

B.Tech - Civil Engineering

2025 - 2029
