Summary

Frontend-focused engineering student at NIT Rourkela. Built hoardspace.in and currently serving as CTO. Skilled in React, Next.js, and modern UI engineering, focused on performance, scalability, and intuitive user experiences.

Experience

CTO, Hoardspace (11/2025 – Present)

- Led frontend development and product architecture, building the platform from scratch using React and Next.js
- Developed responsive and high-performance UI, improving load speed and overall user experience
- Designed scalable frontend structure and reusable components for faster development

Web Developer, Google Developer Students' Club (NIT Rourkela)

- Built and maintained web components and event pages
- Collaborated with team members on frontend development tasks

Education

Bachelor of Technology (2025 – 2029)

National Institute of Technology, Rourkela, Odisha

Skills

- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion
- **Backend:** Node.js, Express.js
- **Languages:** JavaScript, TypeScript
- **Tools:** Git, GitHub

Achievements

- Winner, Google TechSprint 2025–26 (DSC NIT Rourkela)
- 2nd Runner-up, IIT Bhubaneswar Web Hackathon 2026

Projects

Hoardspace – Digital Advertising Platform

<https://hoardspace.in>

- Built a platform to search, compare, and book outdoor advertising spaces across cities
- Developed responsive UI and core features using React and Next.js
- Focused on performance, scalability, and seamless user experience

Pulse UI – UI Component Library (ongoing)

<https://pulseui-henna.vercel.app/>

- Built a scalable UI component library with reusable and interactive components
- Implemented smooth animations and modern UI patterns using React, Tailwind CSS, and Framer Motion
- Includes live documentation and interactive component previews for improved developer experience

Pulse Toast– NPM Package

<https://www.npmjs.com/package/pulse-toast>

- Developed and published a reusable React toast library with customizable UI and smooth animations
- Focused on performance, minimal bundle size, and developer-friendly API design
- Achieved **1500+ downloads on npm**, demonstrating real-world usage and adoption
